NOTICE OF PUBLIC MEETING

The St. Mary's County Metropolitan Commission (MetCom) will hold a Public Informational Meeting to discuss the following projects:

Interceptor Sewer Rehabilitation, Pine Hill Run Road Project No. 8152SR includes the replacement of a portion of existing 33-inch diameter sanitary sewer line with new 42-inch diameter sewer line. This section of pipe runs along the alignment of Pine Hill Run Road from Forest Park Road to the Marlay-Taylor Wastewater Reclamation Facility. The proposed sewer line, consistent with the approved capital improvement budget, will increase capacity and provide new service life to an aging and undersized sewer line.

King Kennedy Water System Replacement Phase 1, Production Well Project No. 3-1-W is MetCom's first phase of King Kennedy's water rehabilitation and replacement efforts. This phase of the project includes the installation of a 150 Gallons Per Minute (GPM) Patapsco Aquifer well (to replace the original 17 GPM well which was abandoned) located on the corner of Independence Drive and King Drive. The existing 70 GPM well will remain in service as a backup well in the event the new well has to be placed out of service. This new well will provide a more reliable source of public water.

The Public Meeting will be held on **Wednesday, November 29, 2017, beginning at 6:30PM** at MetCom's Administrative office, 23121 Camden Way, California, MD. The plans and specifications for the referenced projects may be inspected at the time of the meeting or at MetCom's Engineering Department located at the address above, from 8:00AM to 4:00PM Monday through Friday.

All interested persons are invited to attend this Public Workshop to ask questions regarding these projects. Please contact the Metropolitan Commission offices at 301-737-7400, Ext. 301 or engineering@metcom.org for more information, or if you cannot attend the meeting and would like to provide comment.
